

Key Facts

- Creative Event Agency
- Based in Central London
- Work with large corporations including Amazon, Visa and Santander
- Create events that last a lifetime in your memory

The Client

Experts in Creativity, Strategy, Content, Production, Technology and Logistics, Live Union are a Creative Event Agency specifically based in London all about creating events with memories that last a lifetime...

Designing events to spark collaboration and strengthen relationships between senior leadership roles or put the employees at the heart of the content to improve teamwork. They also design events for Customers, sales teams, hybrid events and major exhibitions.

The Challenge

Working with clients as large as Amazon, Santander and the Post Office, Live Union required a cybersecurity overhaul in order to comply with their requirements.

With Data Protection being such a vital and important part of any business, dealing with clients and corporations that are not only global, but deal with billions of personal data sets, this requires a certain level of responsibility from not only them but anyone they work with.

This required a certain level of planning and discovery for the extent of security Live Union required in order to satisfy the clients conditions.

The Solution

Cloudscape were asked to work on a complete cyber security revamp, with the importance of protecting critical data, the project must be undertaken accurately.

We began with Cyber Essentials. Which helps you guard against the most common cyber threats and demonstrate your commitment to cyber security, this was implemented as a 'Compliance as a Service' offering to ensure continual adherence to the standard.

GDPR policies and procedures were put in place to ensure that the data is managed correctly and that all relevant suppliers handling the data re subsequently GDPR compliant. Being such a critical list of regulations, it's important that every business is completely in compliance.

To finalise the cybersecurity and protection of not only their data but also the large corporations they work with, we upgraded Live Union to a commercial Fortigate firewall with the additional Unified Threat Management. Preventing unwanted malware or various other cyberthreats.
